

SENATOR CHAMBERS: Do they...do the people who undergo this treatment feel pain, or don't you know for sure?

SENATOR CUDABACK: I've never gone through the process, so I really can't say this. But I would assume it would be painless, unless you happen to go too deep and you would draw blood and so on, which would be rather...

SENATOR CHAMBERS: You mean they can draw blood in this process?

SENATOR CUDABACK: I'm not saying they do, but if they went too...

SENATOR CHAMBERS: They can though?

SENATOR CUDABACK: They could if they inserted the needle too depth, maybe beyond the skin.

SENATOR CHAMBERS: So they use a needle. Senator Hall was talking about a barber, barbers don't use needles. So do you think maybe we ought to put in a requirement that they have a little medical school training, because this is similar to surgery, isn't it?

SENATOR CUDABACK: Well, I guess you could relate it to that, although it's not quite that comprehensive.

SENATOR CHAMBERS: So how about if we give them a year of medical school, or a semester?

SENATOR CUDABACK: I might buy that in an amendment.

SENATOR CHAMBERS: He knows how to pull my "fangs". (Laughter.) That's all I have. Thank you, Senator Cudaback.

SENATOR CUDABACK: Thank you, Senator Chambers. I do appreciate your concerns.

PRESIDENT ROBAK: Thank you, Senator Chambers. Is there any further discussion on the advancement of LB 83? Seeing none, Senator Cudaback, do you wish to close? Closing is waived. The question before the body is the advancement of LB 83. All those in favor vote aye; all those opposed vote nay. Have you all voted? Please record.
